SOLUTIONS FOR A PERFECT FINISH

Famis Incorporated, (FAMIS) is a family owned and operated industrial chemicals and coatings distributor. We provide sales, service, and consulting to the industrial paint and finishing markets throughout the Southeastern U.S., Caribbean and Central America. We have over 25,000 sq. ft of warehouse facilities that are fully permitted for heavy industrial manufacturing and distribution. Our unique services include Custom Color matching of any and all finishes such as metallics and specialty stains; Application Equipment sales, design, installation and maintenance. At FAMIS, we have been coatings equipment and application specialists for over 50 years. Work with FAMIS and deliver to your customers the Perfect Finish!

Throughout the Southeast US, Caribbean and Central America, FAMIS is the authorized distributor for wood finishing premier product lines including;

- Chemcraft Wood Finishes
- ICA Italian Specialty Coatings
- Roberlo Specialty Coatings
- 3M™ Abrasives & Adhesives
- Axalta Powder Coatings
- Nordson Powder Finishing Systems
- Kremlin Spray Equipment
- Sheffield
- Diamond Vogel

Chemcraft Colorants 844

Chemcraft 844 colorants are specifically designed for use in high performance, non-aqueous, industrial coatings. The various pigments utilized in this colorant are dispersed in a proprietary acrylic resin. This vehicle provides excellent wetting and dispersion superior to other acrylic resins available.

Chemcraft Colorants 866

Chemcraft 866 colorants are closely controlled, machine dispensable, and dispersion compatible with a variety of non-aqueous industrial coatings. The broad compatibility range of these colorants allows the coatings mfg to reduce the number of pigment dispersions normally required for tinting many special coatings. The solvent in these colorants is a low aromatic, fast drying, rule 66 type solvent.

The purity of coating. Go green without sacrificing top performance. We've taken the best attributes of our existing technologies and adapted them into a complete waterborne finishing system. The Chemcraft® Waterborne System includes Stains, Glazes, Primers, Sealers and Topcoats. This fully integrated product line allows you to keep your projects waterborne from start to finish without compromising quality or durability. A great finish is only the beginning!

WATER BORNE COMPLETE

Waterborne Clear Topcoats & Sealers

SKU #	Description	Sheen
423-1910	Aqualux® Plus Matte	10
423-1920	Aqualux® Plus Low Gloss	20

CHEMGUARD Clear Topcoat

This is a workhorse in the Chemcraft line of Pre-Catalyzed lacquers. In extremely competitive markets, CHEMGUARD provides a price advantage without sacrificing a quality product. Like all our Pre-Catalyzed coatings, CHEMGUARD offers the option of adding a catalyst to increase the resistance. Perfect for those select jobs where a little extra durability is needed without having to stock another product. CHEMGUARD passes all KCMA finish testing.

Item #	Description	Sheen
431-7010	Chemguard II Flat Gloss	10
431-7020	Chemguard II Low Gloss	20
431-7035	Chemguard II Satin Gloss	35

Setting the Bar. For lasting performance that's also user-friendly, look no further than Chemcraft. Perfect for furniture, cabinetry or any wood surface that needs to weather a household storm of cleansers and chemicals. When it needs to be durable and easy-to-use, we have the solution.

CHEMLIFE 24 PLUS White Topcoat is an acid curing, light stable, fast drying Reactive Amino Coating (RAC) with good building properties. It gives a smooth, knock proof and hardwearing surface resisting influence from alcohol, water, etc. Due to its 24-hour pot-life, CHEMLIFE 24 PLUS White Topcoat provides the customer with minimum waste resulting in lower production costs. It also provides very good light stability based on the type of resin used and superior vertical hang.

Varicure® Clear Topcoat

The pinnacle of user-friendly performance. High in solids, easy flowing, quick drying and smooth sanding when used as a self seal. VARICURE Topcoat outperforms the competition in straight out-of-the-can testing. Add an optional catalyst for enhanced performance. Water clear in the can, it resists yellowing due to heat and UVA; it's also formulated to build higher than the average Pre-Catalyzed lacquer. In addition, VARICURE Topcoat is solvent VHAPS free. VARICURE Topcoat passes all KCMA finish testing. Compatible VARISEAL® Sealer available.

PLASTIPRIMER was developed for MDF. This product offers excellent filling capabilities due to its high solid content. PLASTIPRIMER is the fastest drying, acid curing primer for interior use, and gives a smooth, dense finish suitable for top coating to produce very high quality pieces. It provides an excellent base and is extremely easy to sand.

Whether it's a simple wiping stain or a high-tech solid color, Chemcraft has a high quality and user-friendly solution. Our stain bases are designed for use under any of our clear systems. Need solid color? Our C-Match system provides formulas for a rainbow of colors and works with our pigmented bases. Glazes, toners and tints round out a complete line to support all your color needs.

Promatch Stains Promatch® C-Mix Intermix Stains

PROMATCH C-MIX Intermix System

- Uses a simple one-step clear base and fourteen monocolors
- 15 stock stains, and 300 formulas that are quickly and easily duplicated
- Excellent workability - Great open time, easy to wipe
- Excellent adhesion when used under all Chemcraft systems including Polyurethane
- Compatible with 844 and 866 universal tints. (866 recommended)
- Mono colors made with dyes allow matching brighter colors with more depth
- Darker colors possible using mono colors and adding extra tint paste
- Uses the Fillon Pinchon MiniMix 150 for consistent, high-quality results

Pine - 890-8516

PROMATCH FLEXGLAZE

- Increased open time versus industry standards
- Able to be topcoated faster than industry standards - creates great flexibility in any manufacturing process
- Can be used under all Chemcraft solvent technologies
- Ease of touch up blending helps maintain color consistency
- Shortest application time in the industry - eliminates bottlenecks in the finish room
- Available in 6 mono bases that can be intermixed to create a wide range of custom colors
- Can be tinted with 866 colorants - minimizes the need for costly custom colors
- No self-combustible issues - eliminates major safety risk

TYPICALLY RELATIVELY
LOW IN SOLIDS (MID 20%),
ISOLANTE PRODUCTS ARE
DESIGNED TO:

- a) Provide adhesion for subsequent coats (primer)
- b) Stop any resins, etc. from the wood interfering with the catalyzation of subsequent coats (barrier)
- c) Limit the absorption of the coating into the wood (minimizing shrink back)
- d) Penetrate the surface, leaving only a limited film thickness

ICA

The ICA ACRYLIC system is a two-component system which is completely non-yellowing. These products have good physical and chemical strength and excellent abrasion resistance. ICA acrylics offer a good pot life and excellent adhesion.

Designed for full fill (or closed pore) finishes, ICA has a full range of products including "Polyesterino" with separate base and top coats; whether clear or pigmented, gloss or matte, and "Paraffinated Polyester" for full gloss only. Extremely easy to sand and yet with almost no shrinkage even in the long term, ICA Polyesters will remedy your closed pore nightmares.

- FAST FINISH Transparent water-based top coat

CNA Water Based Concentrates are concentrated tints dissolved and stabilized in water. They have excellent transparency and light fastness. CNA water based concentrates are good for both indoor and outdoor use. CNA stains are applied as a spray-no-wipe system with minimal grain rise.

The IRIDEA COLOR tintometric system uses an innovative series of stains called INK and takes into account the current color trends in order to achieve a trendy visual result and a great chromatic impact.

ICA Group invests heavily in the development of new colors to meet more and more the needs of professionals, designers and architects, who must be able to provide innovative, high-performance solutions.

IN solvent-based stains are good for universal use. They can be diluted with solvents or with water (in varying percentages, depending on the tone of color desired), except IN47 and IN914, which can only be diluted with solvent. IN61 cannot be diluted with acetone. IN solvent stains have good light-fastness and can be sprayed, wiped, dripped or rolled on.

When our founder, Andrew Vogel, saw the need for high-quality paint to coat northwest Iowa's creameries, the idea of the Vogel Company was born in 1926.

Soon, he began producing a variety of paints for home and industry. The mission was simple, exceed customer's expectations by delivering a quality solution, and we carry on this tradition today.

TriClad Ultra is a water-based stain intermix system that is designed for spray, no-wipe applications. TriClad Ultra utilizes micro-tint technology which helps achieve excellent clarity, minimal to no grain raising, extremely fast dry times, and no need to wipe.

- Rich, Intense, Deep Color
- Extremely Fast Dry Times
- Designed for Spray Application

TriClad Omni is a water-based wiping stain intermix system used to blend and formulate a wide variety of stain colors. TriClad Omni offers the performance you're used to with solvent-based stains but has the advantage of minimal grain raising, good clarity, and color uniformity.

- Easy to Use
- Easy to Clean
- More Clear than Traditional Water-Based Stains
- Multiple Top Coat Options

Paint has rapidly evolved into a diverse mix of coating technologies. We continually invest in innovation to provide our customers the cutting-edge in powder coating, heavy-duty protective coatings, traffic marking coatings, and architectural coatings.

Sames Kremlin provides industrial solutions for productivity, quality improvement, material & cost savings. Our primary goal is supporting the industrial process from assembly, protection against the environment, to finish by beautifying manufactured products.

Sames Kremlin offers customers complete solutions from pumps to complete application systems. We are designers and manufacturers of process equipment divided into 6 ranges.

10C18 AIRMIX® PAINT PUMP

Recommended for small industries to benefit of both Airmix® spray technology advantages and simple and performing Sames Kremlin pump range. Economic solution to handle low viscosity materials (up to 3000 cps) with a very low motor air consumption and a low volume fluid section for fast color changes with a minimum of product loss.

The 10C18 Airmix® pump packages are available in either stand or wall-mounted versions (cart mounting as an option). Packages are available with one Xcite™ 120 bar manual Airmix® paint sprayer equipped with or without an 06.094 tip size and 7.5m (25ft) fluid and air hoses. A large variety of accessories and tools is available for any customer needs.

AirMiX® 15C25 & 15C25 Mb-A paint pump-stainless steel

True accelerator of performance for your AiRmix® xcite™ gun, the new paint pump Sames Kremlin range brings together Efficiency, Optimization and Simplicity. The innovative design and component quality bring reliability and performance and allow for very simple maintenance, easy cleaning and safe color changes while using a minimum of solvents.

The new air motor design allows a smooth start-up under low pressure air and perfectly controlled fluid output, without any pulsation at the gun with very low air consumption. Stainless steel pump fluid section allows to handle the last generation of paints.

Versions equipped with GT cartridge are recommended for solvent-based paints. Versions equipped with latest technology single block Mb-A cartridge allows to increase the chemical resistivity and are recommended for waterborne and two components paints.

SKU #	Description
668-140-100	System, EOS 15-C25, cart mount, c/w Xcite™ 120, 5 gallon rod

CYCLIX™ AGITATORS FOR
5-55 GAL (20-200 L) DRUMS

This elevator-agitator for 5-55 gal (20-200 L) drums features a bidirectional jack for a fast lift of a stainless steel cover fitted for a quick material drum change. The cover is equipped with a motorized agitator fitted with blades for low viscosity materials and a full stainless steel rod.

The elevator is coming on a large fixing plate which makes it very stable and easy to install in paint kitchens, existing installations or an essential component of new installations.

SKU #	Description

The Cubitron™ II Sanding Disc is a revolutionary advancement in abrasive technology featuring triangular shaped ceramic mineral. As the triangular shaped grain wears, it continually fractures to form sharp points that slice through the substrate, wear evenly and provide extra-long life and consistency.

The 3M™ Paper Disc 236U has long been the industrial workhorse of your abrasive arsenal. With a faster cut, flexibility, longer disc life, and a more durable edge, this abrasive can help you achieve even more. You can rely on the great performance of 236U for all your general industrial applications – from metal to wood to composites.

3M™ Disposable Filtering Facepiece Respirators

3M™ Particulate Respirator 8210 - N95

Breathe easier! Advanced Electrostatic Media technology enhances particulate capture while reducing breathing resistance. Designed with welded strap attachment for greater durability, soft nose foam, for more comfort and adjustable noseclip to help ensure a secure custom seal.

SKU #	Sizes
8210	Universal

3M™ Particulate Respirator 8200 - N95

Economy without compromise. Includes many of the same features as the 8210.

SKU #	Sizes
8200	Universal

3M™ Valved Particulate Respirator 8511 - N95

These respirators all feature the proprietary 3M™ Cool Flow™ Exhalation Valve – designed to release hot, humid exhaled breath quickly, helping to reduce heat build-up and moisture inside the facepiece.

SKU #	Sizes
8511	Universal

Whenever there's a dirty, dusty job to be done, a comfortable respirator can help to make your workers want to wear it and promote compliance as required at all times during exposure to hazardous or unhealthy conditions.

There are options to protect against airborne particles and mists that can affect your workers' health. 3M offers a wide selection of NIOSH-approved filtering facepiece respirators for numerous work-related tasks.
